

# Sharp AR-C150 Color Copier-Printer

Printer

Copier

## Highly Recommended

A really good color printer. Tested print speed 55% faster than its nearest 12ppm competitor, in excess of 3 times the speed of other competing units and even beat a 22ppm rival – making the Sharp AR-C150 the fastest sub 22ppm color printer tested to date.

Image reproduction on graphics – good, price point reasonable compared to rival units.

(Tested: March 2000)
